Federal Aviation Administration

Initial En Route Qualification Training

Instructor
Lesson 10
Board Management

Course 50148001

LESSON PLAN DATA SHEET

COURSE NAME:	INITIAL EN ROUTE QUALIFICATION TRAINING
COURSE NUMBER:	50148001
LESSON TITLE:	BOARD MANAGEMENT
DURATION:	6+30 HOURS
DATE REVISED:	2022-02
VERSION:	V.2022-02
REFERENCE(S):	FAA ORDER JO 7110.65, AIR TRAFFIC CONTROL
HANDOUT(S):	brdmgmt.f2k - EXERCISE STRIPS AND BLANK STRIPS
EXERCISE(S)/ ACTIVITY(S):	ACTIVITY 1: SORTING AND SEQUENCING FLIGHT STRIPS ACTIVITY 2: DIRECTION ARROWS ACTIVITY 3: DIRECTION ARROWS QUIZ EXERCISE: STRIPMARKING
END-OF-LESSON TEST:	YES *(REFER TO ELT10.PDF)*
PERFORMANCE TEST:	NONE
MATERIALS:	NONE
OTHER PERTINENT INFORMATION:	*HAVE ANOTHER INSTRUCTOR ASSIST WITH THE EXERCISE.* *INSTRUCTOR KEY FOR THE E-LEARNING IS INCLUDED AS AN APPENDIX IN THIS DOCUMENT* *EXERCISE:STRIPMARKING INCLUDES A SCRIPT LOCATED IN APPENDIX B OF THIS DOCUMENT*

☞ ***NOTE:*** *As you prepare for this lesson, recall and be prepared to talk about examples and personal experiences that illustrate or explain the teaching points in the lesson.*

INTRODUCTION

Gain Attention

Board management involves sequencing strips and scanning and correctly interpreting the traffic situation, which will allow you to begin planning control instructions. Using knowledge and skills from previous lessons, you will begin to recognize operational priorities and procedural preferences necessary to operate a safe and efficient sector.

INTRODUCTION *(Continued)*

Opening Scenario

BOARD MANAGEMENT

2

☞ ***NOTE:*** *Emphasize that board management allows the controller to effectively plan control instructions that will resolve potential traffic problems.*

Purpose

Board management includes techniques for sector management. You will learn to scan and sequence strips and to determine flight direction by reading the spaces on the flight progress strips. You will also learn how to plan in conjunction with stripmarking, avoid conflicts, determine priorities, and apply procedures.

INTRODUCTION *(Continued)*

Lesson Objectives

LESSON OBJECTIVES

- On an End-of-Lesson Test and in accordance with FAA Order JO 7110.65, you will identify:
  - Procedures for sequencing, scanning, and removing flight progress strips
  - Procedure for nonreceipt of a position report

3

☞ ***NOTE:*** *Teach from graphic.*

BOARD MANAGEMENT

☞ ***NOTE:*** *The following procedures for board management involving the sequence and order of flight progress strips are* ***no*** *longer contained in FAA Order JO 7110.65; however, it is recommended that the students follow these procedures while in the labs.*

Fix Designators

FIX DESIGNATORS

4

⊙ Arrange strips under the appropriate fix designator.

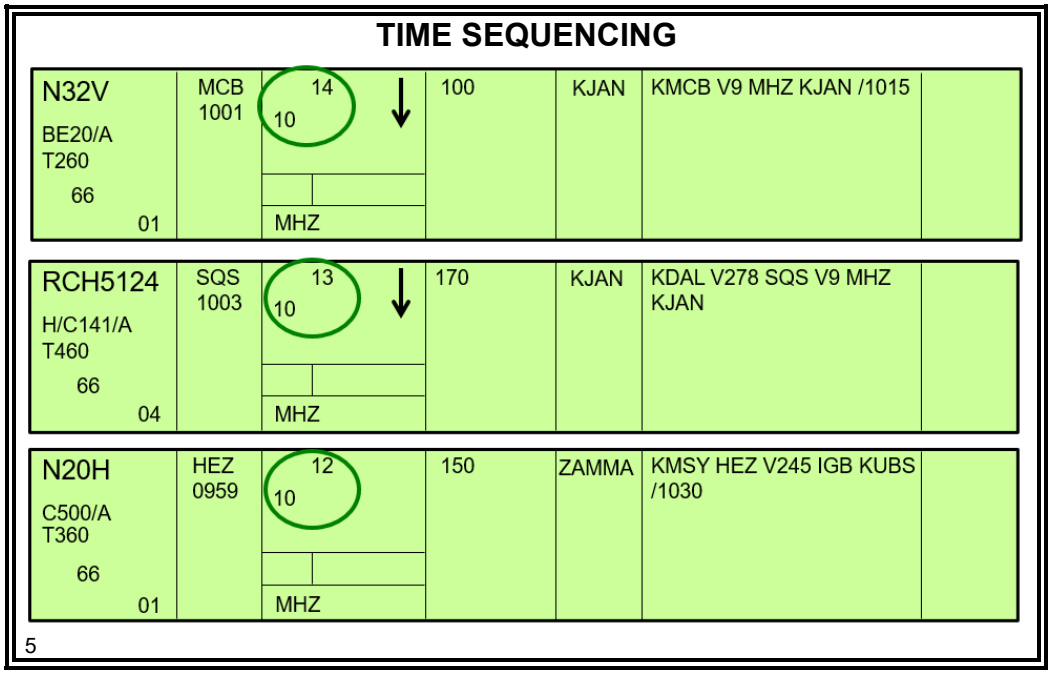
☞ ***NOTE:*** *Demonstrate strip bay setup and organization techniques to students. Discuss the following board management section during your demonstration.*

⊙ Proposal strips are placed in the Suspense Bay (at ZAE, the Suspense Bay is above each bay header).

- For multiple strips on proposals, the first strip is placed below the second strip.
- Strips are sequenced according to P Time in Suspense Bay.

SEQUENCING FLIGHT STRIPS

Time Sequencing



☞ ***NOTE:*** *Click once to highlight the posted times.*

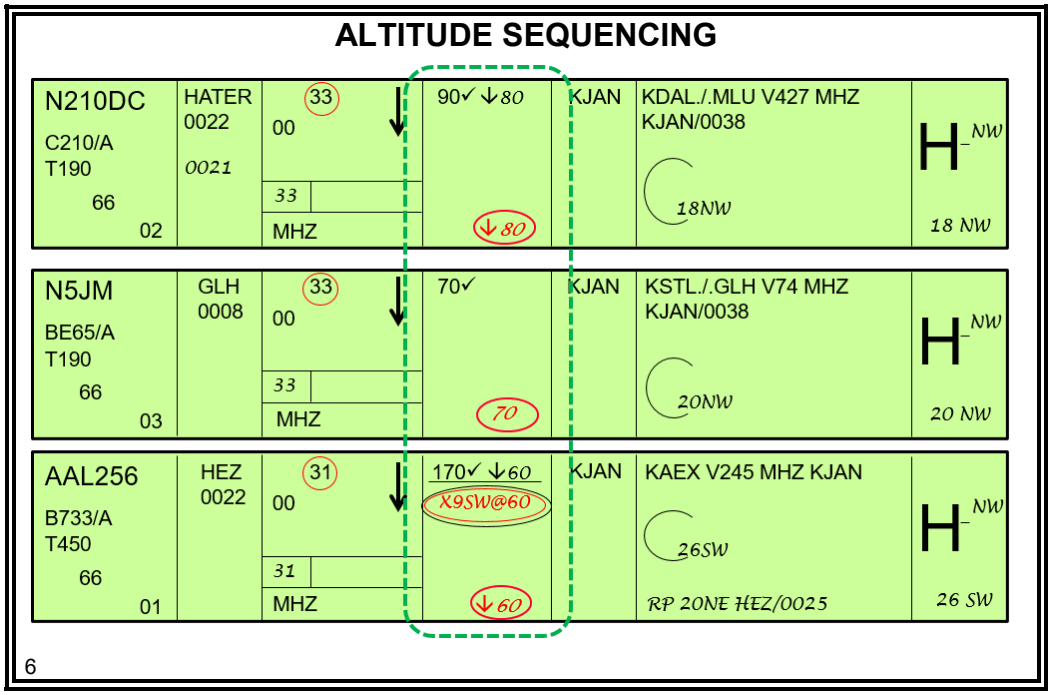
⊙ Post strips in the appropriate low or high altitude sector according to altitude/flight level.

⊙ Sequence strips in:

- Chronological order of arrival over posted fix (time sequencing)
  - Earliest at the bottom
  - If times are the same, sequence strips by altitude with lower altitudes below higher altitudes

SEQUENCING FLIGHT STRIPS *(Continued)*

Altitude Sequencing



☞ ***NOTE:*** *Click once to highlight posted altitudes.*

- Ascending order of altitudes over posted fix (altitude sequencing)
  - Lowest on the bottom
  - Most often used in holding stacks

ACTIVITY 1: SORTING AND SEQUENCING FLIGHT STRIPS

Activity 1

SORTING AND SEQUENCING ACTIVITY

Purpose: to practice sorting and sequencing flight strips

7

☞ ***NOTE:*** *Have the students access the IET eLearning menu and select the first activity for Lesson 10.*

Description

In this activity, you will be presented with four sets of flight strips. You will need to arrange each flight strip in the correct bay and in the correct sequence within each bay. Feedback will be given immediately.

Directions

Access the IET eLearning menu. Select **Lesson 10 – Board Management**. Click **Sorting and Sequencing** activity.

Time Allotted

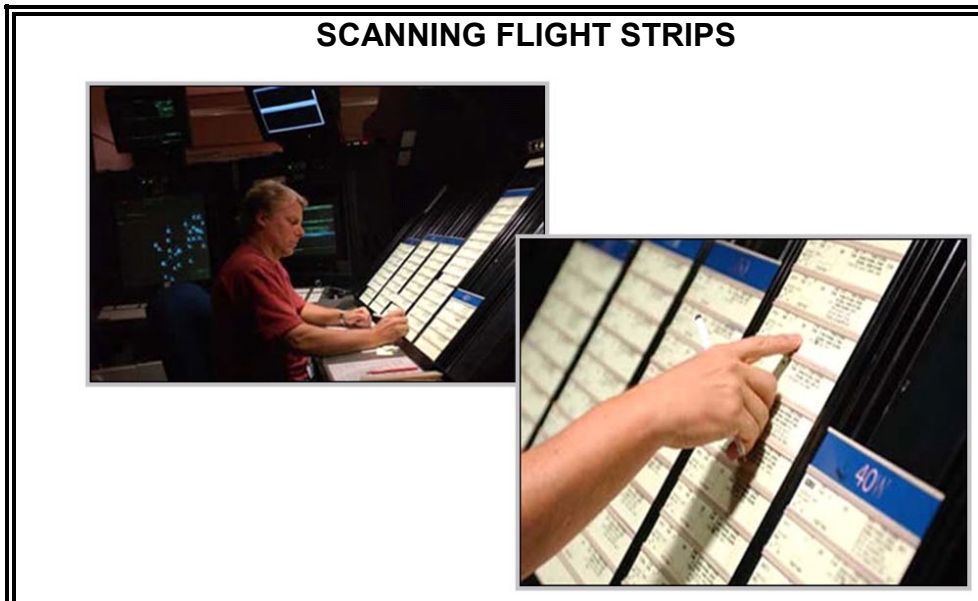
30 minutes

☞ ***NOTE*:** *Refer to Appendix A for the Instructor Key for this eLearning activity.*

☞ ***NOTE:*** *Remember to disable the eLearning after the students complete the eLearning.*

SCANNING FLIGHT STRIPS

Scanning Flight Strips



- Scan flight progress strips for:
  - Proper sequence
  - Conflicts
  - Inappropriate Altitude For Direction Of Flight (IAFDOF)
  - Arrivals
  - MEA violations
  - Routing errors
  - Coordination functions
  - Type aircraft
    - Number of aircraft, if more than one
    - Category, if aircraft is heavy
  - Non-DME
  - Speed

SCANNING FLIGHT STRIPS *(Continued)*

Less-Than-Minimum Separation Situations
JO 7110.65, par. 2-3-10, fig. 2-3-8

WARNINGS

N1194C C441/A T240 66 01	HEZ 1528	48 15 MHZ	90 W W	ZAMMA	KAEX V245 IGB KBNA/1651	
N143MH PA31/A T170 66 03	GLH 1521	44 15 MHZ	90 W	MIZZE	KPBF V74 MHZ V11 GCV KMOB/1639	

9

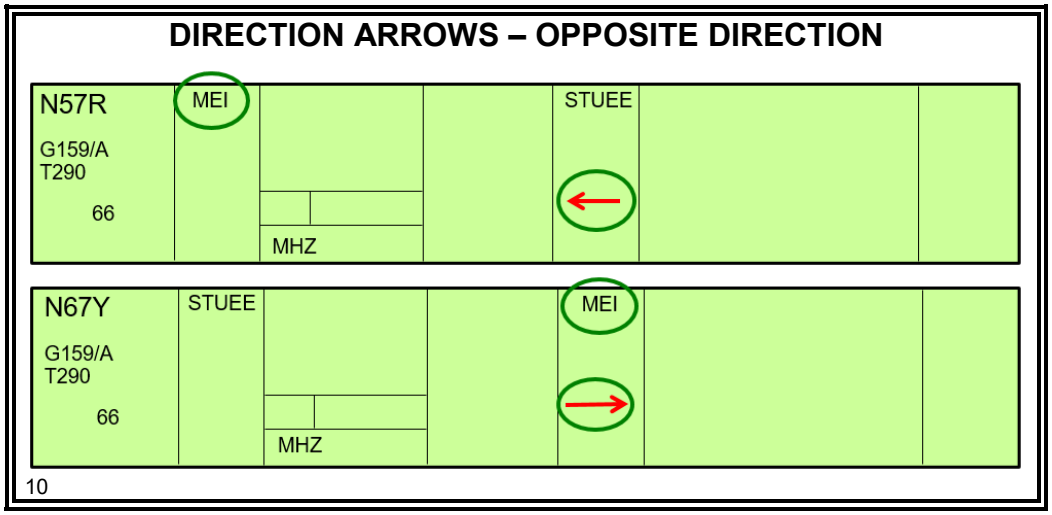
☞ ***NOTE:*** *Click once to display red Ws.*

⊙ Red W (warning) on a strip indicates:

- Less than 10 minutes at the same fix and altitude
- Aircraft conflict
- MEA/MOCA violation
- Warning/Prohibited Area violation

DIRECTION ARROWS

Opposite Direction
JO 7110.65, par. 2-3-2



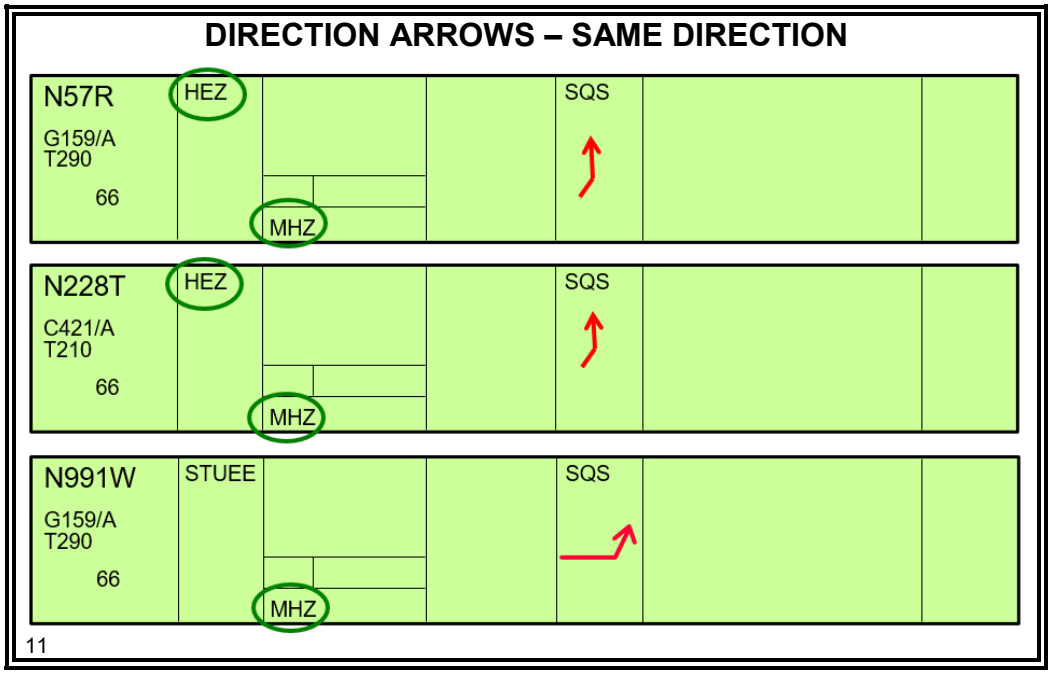
☞ ***NOTE:*** *Click once to highlight the direction arrows. Click again to highlight that the previous fix on the top strip and the next fix on the bottom strip indicate opposite traffic.*

⊙ Use red direction arrows in space 23 to help determine:

- Opposite direction traffic
  - Previous fix (space 11) on one strip will be the same as next fix (space 21) on the other strip
  - Current fix (space 19) will usually be the same for both

DIRECTION ARROWS *(Continued)*

Same Direction
JO 7110.65, par. 2-3-2

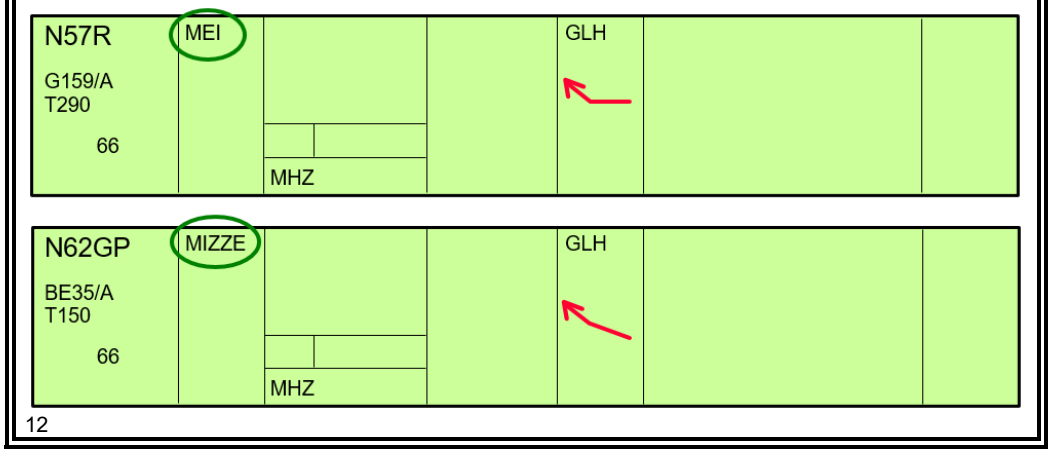


☞ ***NOTE:*** *Click once to highlight previous and next fixes.*

- Same direction traffic
  - Previous fix (space 11) and next fix (space 21) will usually be the same on both strips

DIRECTION ARROWS *(Continued)*

Crossing/ Converging Traffic
JO 7110.65, par. 2-3-2



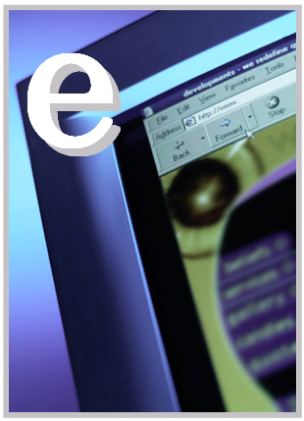
☞ ***NOTE:*** *Click once to highlight previous fixes.*

- Crossing/converging traffic
  - Previous fix (space 11) will be different, and next fix (space 21) may be the same or different

ACTIVITY 2: DIRECTION ARROWS

Activity 2

DIRECTION ARROWS ACTIVITY



Purpose: to practice using direction arrows on flight strips to identify conflictions

13

☞ ***NOTE:*** *Have the students access the IET eLearning menu and select the second activity for Lesson 10.*

Description

In this activity, you will be presented with seven sets of flight strips. Each set will mimic a bay in which the flight strips have already been sequenced and sorted. You will also be presented with a set of direction arrows. You will need to drag and drop the correct direction arrow to the correct location on each flight strip.

Directions

Access the IET eLearning menu. Select **Lesson 10 – Board Management**. Click **Direction Arrows** activity.

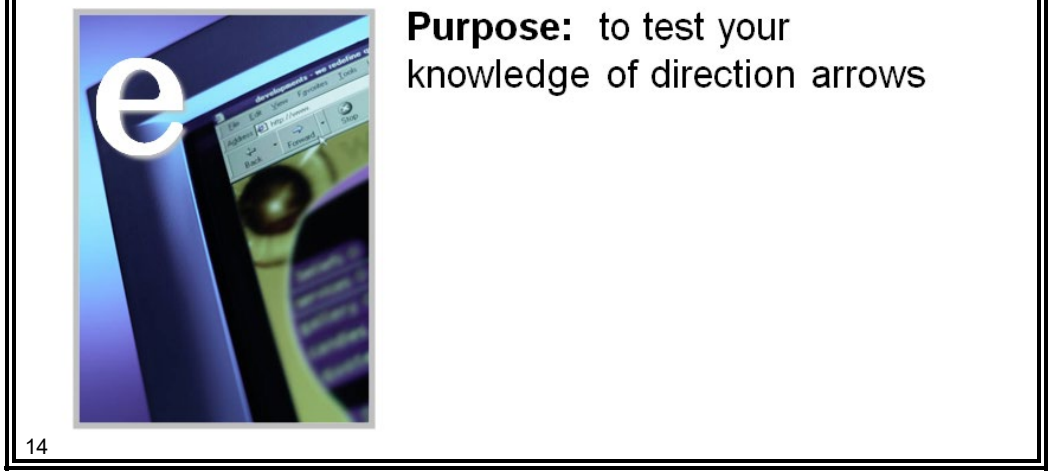
Time Allotted

15 minutes

☞ ***NOTE:*** *Refer to Appendix A for the Instructor Key for this eLearning activity.*

ACTIVITY 3: DIRECTION ARROWS QUIZ

Activity 3



☞ ***NOTE:*** *Have the students access the IET eLearning menu and select the third activity for Lesson 10.*

Description

In this activity, you will apply your map knowledge and test your ability to place the correct direction arrows on flight progress strips. You will be given a total of 10 flight strips, which display one at a time. Along with each flight strip, you are given a table containing various direction arrows. You **must** click the correct direction arrow that applies to the given flight strip.

Directions

Access the IET eLearning menu. Select **Lesson 10 – Board Management**. Click **Direction Arrows Quiz** activity.

Time Allotted

10 minutes

☞ ***NOTE:*** *Refer to Appendix A for the Instructor Key for this eLearning activity.*

☞ ***NOTE:*** *Remember to disable the eLearning after the students complete the eLearning*

SECTOR MANAGEMENT

Solutions to Traffic

⊙ Determine different solutions to traffic situations.

- Analyze the situation to determine alternative solutions based on:
  - Pilot's request
  - Other controller's request
  - Operational priorities
  - Operational advantage

NOTE: Solutions to traffic situations are taught in later lessons.

Removing Flight Progress Strips

JO 7110.65, par. 2-3-1

⊙ Remove flight progress strips when they are **no** longer required for control purposes.

Nonreceipt of Position Report

JO 7110.65, par. 6-1-2

⊙ Take action to obtain a position report affecting separation **no** later than 5 minutes after the aircraft is estimated over the fix.

SECTOR MANAGEMENT *(Continued)*

Taking Control of a Sector

⊙ Follow this suggested checklist when preplanning a problem or taking control of a sector:

PRE-PLANNING CHECKLIST	
✓	Stuff and sequence strips.
✓	Check for TUX aircraft.
✓	Check altitude if on frequency.
✓	Mark directions arrows.
✓	Check for IAFDOF.
✓	Mark all conflicts with red Ws.
✓	Resolve conflictions.
✓	Plan all arrival restrictions.
✓	Establish priorities.

EXERCISE: STRIPMARKING

Exercise, Part 1

STRIPMARKING EXERCISE, PART 1

Purpose: to practice marking flight progress strips

Directions: set up bays and bay headers; mark provided strips based on scripts read aloud by instructor

15

Directions

☞ ***NOTE:*** *The script for this exercise is located in appendix B.*

This exercise is in three parts. In each part, your instructor will read the script of traffic situations. You will use bay headers for D66 (Magnolia), set up bays, and do the necessary stripmarking on the strips provided. At the end of each part, your instructor will stop and discuss your answers. If necessary, the instructor may stop the clock midway through a part in order to answer questions that may arise.

29

IN CONCLUSION

Lesson Review

LESSON REVIEW

The following topics were covered in this lesson:

- Sequencing of flight strips
- Scanning of flight strips
- Direction arrows
- Sector Management

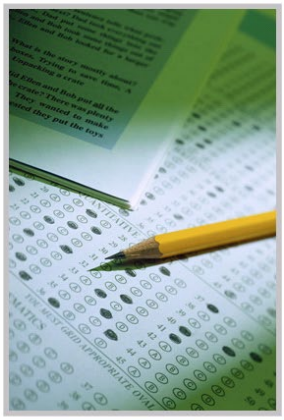
30

☞ ***NOTE:*** *Teach from graphic. Review and elaborate briefly on the topics covered in this lesson.*

End-of-Lesson Test

END-OF-LESSON TEST

Board Management



31

☞ ***NOTE:*** *Stripmarking exercise begins on the next page.*

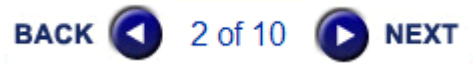
APPENDIX A: INSTRUCTOR KEY FOR ELEARNING ACTIVITIES

Purpose

This document serves as a guide for facilitating the eLearning activities of the Initial En Route Training course and provides an overview of the objectives and content of the eLearning activities within this lesson.

Navigation

- To navigate within the eLearning activities, a Navigation Bar is positioned at the top right of the page and contains the following options:
  - MAIN MENU: Allows students to access a main menu listing all of the eLearning activities
  - RESOURCES: Allows students to access additional resources, including:
    - A **Glossary** link
    - A **References** link
    - A **Help** link
  - EXIT: Allows students to exit from the eLearning activity at any time



- To navigate within an activity, a navigation tab is also positioned near the top right of the screen, just below the navigation bar.
  - The navigation tab contains the following buttons:
    - BACK: When active, returns students to the previous page
    - NEXT: When active, allows students to advance to the next page

NOTE: Inactive BACK and NEXT buttons indicate students are at the beginning or at the end of a lesson.

Navigation Tips

- To refresh a page or reset an activity, press **F5**.
- You can advance to a specific page in the activity without completing the activity. Click the **NEXT** or **BACK** buttons until the page is displayed.

Continued on next page

APPENDIX A: INSTRUCTOR KEY FOR ELEARNING ACTIVITIES (*Continued)*

Lesson Title	Lesson 10 Board Management
eLearning Objectives	The objectives of the following eLearning activities are to reinforce: sorting of progress strips into their appropriate bays; sequencing of progress strips in the correct order within the bays based on time and altitude; positioning of red direction arrows on flight progress strips; and applying map knowledge in order to draw direction arrows according to the route of flight outlined on the flight strip
eLearning Activities	⊙ Lesson 10 contains the following eLearning activities: • Activity 1: Sorting and Sequencing Strips • Activity 2: Direction Arrows Practice • Activity 3: Direction Arrows Quiz

Activity 1: Sorting and Sequencing Strips

Activity 1 Description	In this activity, students are presented with four sets of strips. Students **must** arrange each strip in the correct bay and in the correct sequence within each bay.
Activity 1 Content	⊙ Page 1 contains an activity introduction. ⊙ Pages 2-5 contain drag and drop activities to practice sorting and sequencing flight progress strips by placing strips into the appropriate position within a bay.

Continued on next page

APPENDIX A: INSTRUCTOR KEY FOR ELEARNING ACTIVITIES *(Continued)*

Activity 1 Specifics

- Drag and drop activity
  - On pages 2-5, students have two attempts to drag and drop the given flight progress strip to the correct location within the appropriate bay.
  - Students can click  to learn more information about the activity.
  - At the end of each set, students should click **RESULTS** to see how many strips were placed correctly on first and on second attempt.
  - In Set 4, students **must** place all strips correctly on first attempt. If they do **not**, then they **must** click **START OVER** and the activity will reset.

Activity 2: Direction Arrows

Activity 2 Description

In this activity, students are presented with seven sets of flight strips. Each set mimics a bay in which the flight strips have already been sequenced and sorted. The student is also presented with a set of direction arrows. Students **must** drag and drop the correct direction arrow to the correct location on each flight strip.

Activity 2 Content

- Page 1 contains an activity introduction.
- Pages 2-7 contain drag and drop activities to practice placing direction arrows on flight progress strips.

Activity 2 Specifics

- Drag and drop activity
  - On pages 2-7, students **must** place the arrow in the fifth column of the flight progress strip or it will snap back to its original position.
  - Students can click  to learn more information about the activity.

Continued on next page

APPENDIX A: INSTRUCTOR KEY FOR ELEARNING ACTIVITIES *(Continued)*

Activity 3: Direction Arrows Quiz

Activity 3 Description

In this activity, students apply their map knowledge and test their ability to place the correct direction arrows on flight progress strips. They are given a total of 10 flight strips, which display one at a time. Along with each flight strip, students are given a table containing various direction arrows. Students **must** click the correct direction arrow that applies to the given flight strip.

Activity 3 Content

- Page 1 contains an activity introduction.
- Pages 2 and 3 contain a hot spot quiz in which students click the appropriate arrow for the flight progress strip.

Activity 3 Specifics

- Hot spot quizzes
  - Students have 5 minutes to complete each quiz (Rounds 1 and 2).
  - Students have one attempt to answer the question before they are given feedback (either incorrect or correct).
  - At the end of each quiz, they should click **REVIEW ANSWERS** to see their answers and the correct answers.

APPENDIX B: EXERCISE: STRIPMARKING

Directions

☞ ***NOTE:*** *Have another instructor assist with reading the script.*

Exercise, Part 1

This exercise is in three parts. In each part, your instructor will read the script of traffic situations. You will use bay headers for D66 (Magnolia), set up bays, and do the necessary stripmarking on the strips provided. At the end of each part, your instructor will stop and discuss your answers. If necessary, the instructor may stop the clock midway through a part in order to answer questions that may arise.

☞ ***NOTE:*** *When the exercise starts, the clock time should be 0005 and the altitude of N210DC (80) should be underlined in red (IAFDOF). CBM 3 MOA is in use.*

☞ ***NOTE:*** *After each part, display the answers and discuss with class (IE… THE SLIDES TO START PART 2 ARE THE ANSWERS TO PART 1; THE SLIDES TO START PART 3 ARE THE ANSWERS TO PART 2; FINAL ANSWERS ARE THE ANSWERS TO PART 3).*

☞ ***NOTE:*** *Pass out strips titled **brdmgmt**. Have students use these strips for the exercise. Reasons for the traffic restrictions issued are taught in later separation lessons and discussion of them now is inappropriate. Discussion of boundary crossing restrictions is appropriate. You may give each student an extra set of blank strips to ensure the correct answer was recorded on the strip after the answer was reviewed.*
